

Parakeet

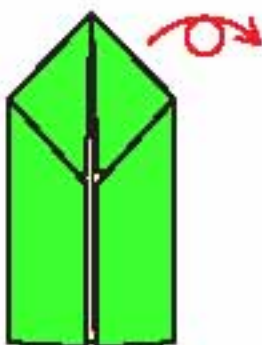

1. Begin with a square, plain side up. Fold in half, and then unfold.

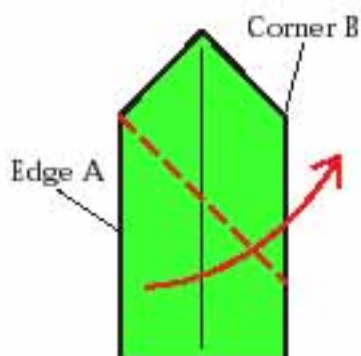

2. Fold the top corners in to meet the center crease.

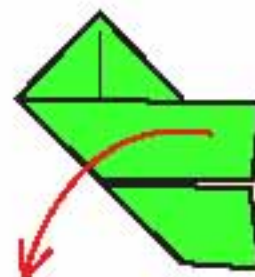

3. Fold the sides in to meet the center crease.

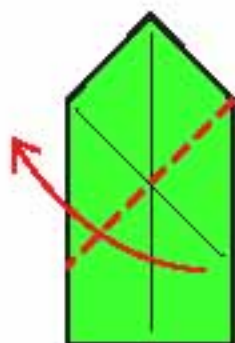

4. Turn over.

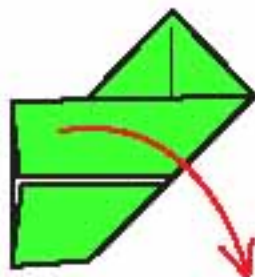

5. Fold up, such that "Edge A" hits "Corner B."

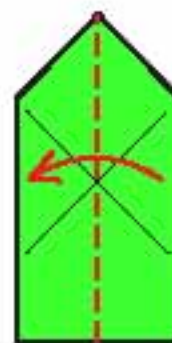

6. Unfold.

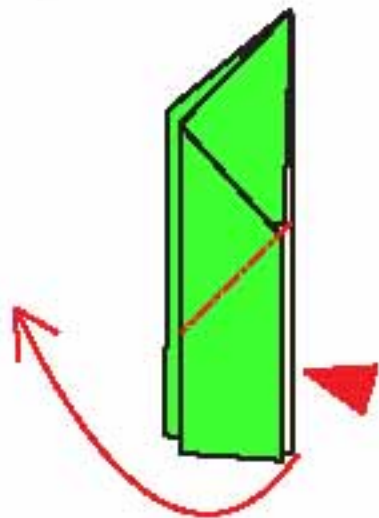

7. Fold up (like step 5, but in the opposite direction).

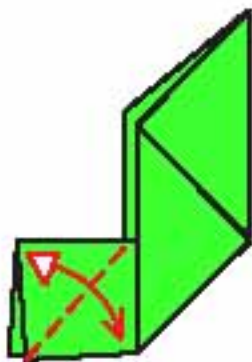

8. Unfold.

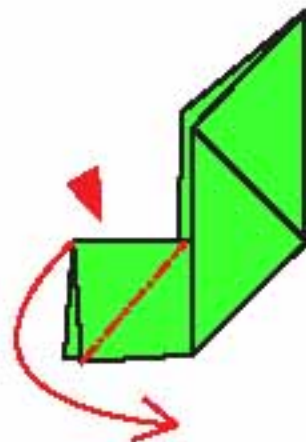

9. Fold in half.

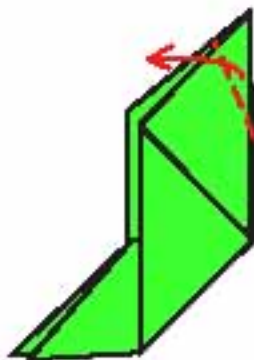

10. Invert the lower portion of the model, pushing in by the shaded arrow.

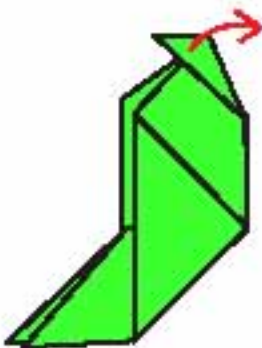

11. Fold the square section of the model in half, and then unfold.

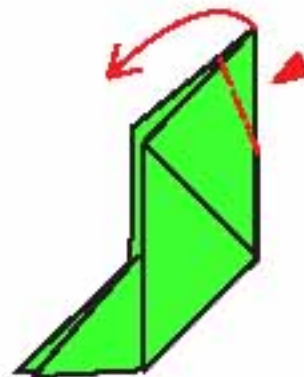

12. Invert the indicated corner (similar to step 10).

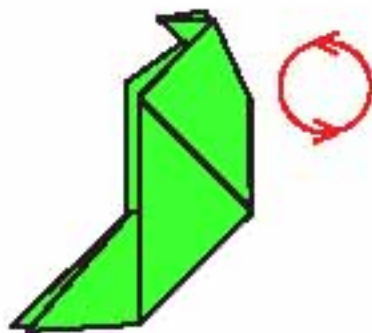

13. Fold over the top point. The angle you chose will determine the shape of the beak.

14. Unfold.

15. Invert the top corner along the fold you just made.

16. Rotate the model slightly.

17. Completed Parakeet.
